About St Vincent's University Hospital

St Vincent's Hospital was founded by Mother Mary Aikenhead foundress of the Religious Sisters of Charity and established at St Stephen's Green in 1834. The hospital transferred to its present site in Elm Park in 1970 and subsequently changed its title to St Vincent's University Hospital in 1999.

nurseeducationcentre@svuh.ie

St. Michael's Hospital, Dun Laoghaire was founded in 1876 and governed by the Sisters of Mercy. Transfer of ownership of St. Michael's to the Religious Sisters of Charity took place in March 2001 in exchange for the Children's Hospital, Temple Street.

St. Vincent's University Hospital is a major academic teaching hospital. We provide a front line emergency service and national/regional medical care at inpatient and outpatient level. St. Vincent's University Hospital provides in excess of forty medical specialities. The hospital has approx. 600 in-patient beds, incorporating 7-day, 5-day and day care options. St Vincent's University Hospital is a health promoting hospital. Education and research are major components of the philosophy of St. Vincent's University Hospital.

Facilities are provided for the academic and clinical training of medical students, nurses, laboratory technicians, research scientists, physiotherapists, occupational therapists, radiographers, medical social workers, dieticians and speech therapists. St Vincent's University Hospital is a NO SMOKING hospital. Visitors are prohibited from smoking on the premises.

Our Mission

St Vincent's Healthcare Group is a non-profit group that is trusted by patients to provide best care through an expert team with the right processes and resources, and an approach that ensures each patient has access to the right treatment.

1. Best patient care

We will provide the highest quality patient care, always recognising our values of human dignity, compassion, justice, quality and advocacy. We will treat patients with warmth, empathy and understanding and respect their concerns, feelings and expectations.

2. Best team and resources

We will strive to recruit and retain excellent people at all levels, and to ensure they work with modern and efficient facilities and technologies to deliver best outcomes for all our patients. We will deliver comprehensive programmes of research and education involving leading medical colleges.

3. Best processes

We will maintain a healthy and safe environment and provide a healthcare service that is efficient and cost-effective, so that we deliver the best possible return for monies invested. Our hospitals will be well managed and accredited to the best international standards.

4. Best approach

We support an integrated model of healthcare for Ireland and we recognise our responsibility to work with others to make that a reality and to ensure all patients have access to the right medical treatment regardless of race, religion or ability to pay

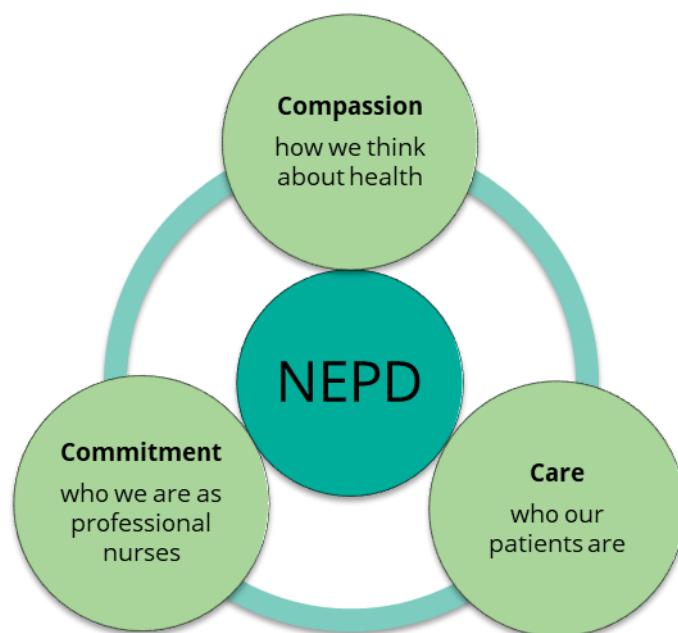

Ann Flynn
Director of Nursing

Nurse Education and Practice Development (NEPD) Philosophy

Underpinning our philosophy are the Nursing and Midwifery values of Compassion, Care and Commitment, whose associated behaviours are the essence of Nursing and Midwifery practice and form the basis for professional decision making and actions.

The Nurse Education and Practice Development Department philosophy is based on the three philosophical principles of Careful Nursing ©:

1. *Understanding who we are as professional nurses*

Patient safety and the delivery of high quality care by competent nurses is always the priority. Nursing education promotes lifelong learning and continual personal and professional development to enable nurses to be effective decision-makers in practice. We support, guide and encourage all nurses as they gain knowledge, skills and attitudes to be competent clinical practitioners using Biggs (1996) model of constructive alignment in curriculum design to develop all nursing education in this Centre.

2. *Understanding who our patients are and the nature of our relationship with them*

We have a strong team spirit and together we strive to create partnership with our patients, colleagues in the clinical areas and with all other disciplines to encourage a person-centred approach to care. We will continue to develop nursing practice with an enthusiastic and positive attitude and ensure the specific clinical education needs are analysed and addressed as they relate to each patient in our care.

3. *Understanding how we think about health*

Nurses as learners are self-motivated and engage proactively in their own learning. Learners are encouraged to build on their own body of knowledge based on individual experience and to apply this knowledge directly to the health care environment. We aspire to continually develop and maintain best practice in nursing and endeavour to promote continuous quality improvement in patient care.

Curriculum Framework

The starting point for creating learning opportunities is to clarify the competence or learning outcome that the person must demonstrate (Biggs, 1996; Botma, Van Rensburg, Coetzee, & Heyns, 2015). The process of competence is achieved by activating foundational knowledge, with procedural knowledge and conditional knowledge to become functional knowledge in performing the skill required (Biggs, 1996). Constructive alignment theory focuses on the learning system as a whole, the mechanism of aligning all of the components of learning activity that is systems of teaching, learning and assessing (Biggs & Tang, 2012).

In the context of post-registration continuing professional development learning will occur in a facilitative relationship where participant's will be given clear guidelines and objectives to develop or enhance identified skills and competencies (Timmins, 2008). The teachers will act as facilitators to learning, participant's will be provided with some learning sources but encouraged to also self-select additional sources and will also be required to self-assess during the process with a competency assessment at the summation (Mazmanian & Feldman, 2011; Murad, Coto-Yglesias, Varkey, Prokop, & Murad, 2010). In a professional capacity however, learning differs in that expectation of nurses' competency is pre-set and are required to perform at a specific competent level (Timmins, 2008).

Teaching and Learning

Creating active learning experiences is the role of the teacher. Participant focused teaching and active learning incorporates a variety of learning activities (Pickering and Roberts, 2018, Betihavas et al., 2016, te Pas et al., 2016). This process involves proving new material outside the classroom and face-to-face time is devoted to the application of knowledge to skills. This is the foundational principle on which a learning unit is built. The learning unit allows the participant to actively construct new knowledge at their own pace in an environment of their choosing. Selecting a learning unit to complete is done in collaboration with nurse managers, who determine appropriate units for their specific clinical environment. Some learning units are a precursor to commencing a skill that will require additional supervision and assessment to demonstrate competence in the clinical area. Other learning units are linked with a specified course and therefore embedded in additional assessments to amalgamate a number of units for incremental learning in a specialist area.

Mary Ryder
Director of Nurse
Education & Practice
Development

Nurse Education Centre

The aim of the Nurse Education Centre in St. Vincent's University Hospital is to ensure clinical practice is at the forefront of all nursing education. We value nursing professional development and provide education for all levels within the Nursing Department. We believe well educated and clinically strong nurses will deliver the highest standard of care for our patients. Our hospital mission and values help us put our patients at the centre of everything we do, by valuing human dignity, compassion, justice, quality and advocacy. Our collective mission is to strive to maintain excellence in clinical care, education and research.

The Director of the Centre for Education and Practice Development, Ms. Mary Ryder, is a joint appointment with St. Vincent's and University College Dublin (UCD), School of Nursing , Midwifery and Health Systems. This allows for stronger links and greater collaboration between our nursing department and our partner university.

What support is available?

All staff are encouraged to apply yearly to the Director of Nursing for assistance with funding and study leave for courses. We provide clinical support from senior nurses in the hospital called Clinical Facilitators. These nurses offer education and bedside support to help staff develop their knowledge and skills in clinical practice. Support is also available from the Clinical Nurse Specialists and Advanced Nurse Practitioners attached to each speciality.

In the Nurse Education Centre we have a group of experienced Registered Nurse Tutors who coordinate and teach a multitude of in-house and university accredited programmes, and are available to advise staff on their academic studies.

Nurse Education team

Nurse Practice Development team

Nursing Practice Development

The Nursing Practice Development Department focuses on developing and supporting staff with evidence based practice standards across the hospital. The department is led by Ms. Carolyn Donohoe, the Assistant Director of Nursing and Practice Coordinator.

As an academic teaching hospital, we provide excellent clinical placements for undergraduate nursing students for the General Programme, the combined Children's' & General and Programmes and the Mental Health Nursing Programme. We have Clinical Placement Coordinators to support the students and help clinical staff provide a positive learning environment and culture of continuous education.

For qualified staff, the Nursing Practice Development team provide short skills based courses and ward based learning sessions and support. If you have a clinical query, we are at the end of the telephone and will do our best to point you in the right direction and address your learning needs.

We have a wealth of up-to-date clinical policies, guidelines and procedures, which are evidence based and available on all computers in the hospital. New staff to the hospital are provided with a group orientation on their first day, followed by a variety of practice induction programmes, and we work with you to ensure it suits your individual needs.

There are opportunities for clinical staff to take on fixed term project work and develop a whole new range of skills.

The Clinical Placement Co-ordinator team

Definitions

Programme

This is a defined set of learning units available within the organisation.

Course

This is a series of learning units in a particular subject, leading to an examination or qualification.

Learning Units

These set out directives for a particular unit of study, usually on one topic. The nurse as participant studies the topic online, supported by recommended reading, websites and video clips and attends a workshop to consolidate the learning. Assessment for competence in the skill/activity may be required after the workshop.

Workshop

Usually a brief intensive educational session for a relatively small group of people that focuses especially on techniques and skills in a specific field

Induction

The formal process of orientating someone into a new job or position within the organization

Orientation

The process of giving people guidance, information and training about a new job and/or organization

Continuing Professional Development (CPD)

Is a lifelong process that encompasses both activities and processes through structured and informed learning, that contribute toward on-going development of a nurse or midwife as a healthcare professional (Nursing and Midwifery Board of Ireland, 2015).

Module

One part of a set of parts that combined will complete a Learning Unit/Course

SVUH and UCD provide graduate programmes to prepare nurses to excel as care-givers and as leaders. We have the largest graduate nursing and midwifery student population of any higher education institution in Ireland. UCD has a reputation for academic excellence, quality teaching and innovative research, ensuring that students gain valuable knowledge and specialist skills which are current, relevant, marketable and responsive to community health care needs now and in the future. Our graduates have gone on to assume key positions in the professions, both nationally and internationally.

Nurse Induction

About

The aim of this induction is to provide new registered nurse recruits with an introduction to some of the resources, processes, systems and people that will help them integrate into the Hospital. The *Nurse Induction Orientation Handbook* has been designed to further support and enhance this integration process.

Who is eligible?

Newly recruited registered nurses.

How is it delivered?

This induction is delivered in-house

Can external applicants apply?

This induction is for SVUH newly recruited registered nurses only.

New Graduate Induction

About

The purpose of this induction is to support the newly qualified nurse in the transition from student to registered nurse.

Who is eligible?

Newly registered and pre-registered nurses.

How is it delivered?

This induction is delivered in-house

Can external applicants apply?

This induction is for SVHG trained student nurses only.

For more details contact: Lisa Murphy, CNM2, (01) 2214023

Cost:

Free for staff new to SVUH

Number of places

available: 25 places available

Frequency:

Monthly

Closing Date:

One week prior to commencement

Duration:

8.00am—4.30pm

Practice Support Orientation

About

The Practice Support Programme is provided by St. Vincent's University Hospital to Registered Staff Nurses who have been employed and working in non-acute hospital settings and wish to make the transition to the acute setting. The programme takes five weeks to complete (including 1 week orientation/induction).

Who is it aimed towards?

Registered Staff Nurses employed in non-acute hospital settings (e.g. Nursing Homes).

How is it delivered?

A mixture of classroom based education sessions, simulation, workshops, online learning and clinical placement

Can external applicants apply?

Yes

Cost:

For costs details please enquire within the Nurse Education Centre

Number of places available:

Variable

Frequency:

Variable, on needs basis

Closing Date:

Not applicable

Duration:

5 weeks

Overseas Adaptation Course

About

The Overseas Adaptation Course is provided by St. Vincent's University Hospital to Staff Nurses educated in non-EU countries. On completion of the course and once competency in the associated practice domains has been achieved, nurses become eligible to apply for Irish Nursing Registration with NMBI. Candidate Nurses remain supernumerary for the duration of the course. The course takes seven weeks to complete (including 1 week orientation/induction) but this can be extended to twelve weeks.

Who is it aimed towards?

Non-EU trained Staff Nurses

Who is eligible?

Non-EU trained staff nurses who possess temporary candidate registrations from NMBI

How is it delivered?

A mixture of classroom based education sessions, simulation, workshops, online learning and clinical placement

Can external applicants apply?

The Overseas Adaptation course is only available to staff recruited within St Vincent's University Hospital

Cost:

For costs details please enquire within the Nurse Education Centre

Number of places available:

Variable

Frequency:

Variable, on needs basis

Closing Date:

Not applicable

HCA Induction

About

The HCA Induction is available to all new Health Care Assistants in the hospital. It runs over two days. It is a combination of theory and workshops. The aim of the HCA Induction is to provide the knowledge and skills required to provide safe care to our patients.

Who is it aimed towards?

The induction is provided for all new HCAs in the hospital.

Who is eligible?

Health Care Assistants who are new to the hospital or those who are struggling with different aspects of their job role.

How is it delivered?

In-house

Can external applicants apply?

The HCA Induction is only available to new HCAs in SVUH.

Cost:

Free for internal applicants

Number of places available:

Minimum 5

Maximum 14

Frequency:

On-going as required

Closing Date:

Not applicable

Duration:

Two days (08.00-16.15)

QQI Health Service Skills Course - Level 5 Major Award (5M3782)

About

The purpose of this course is to enable the Healthcare Assistant learner to acquire the knowledge, skills and competence to work under the supervision of a Registered General Nurse (RGN), in a variety of healthcare settings to enhance their role in service provision to patients.

The course consists of eight modules: Activities of Living Patient Care, Care Skills, Infection Prevention and Control, Care of the Older Person, Communications, Care Support, Safety and Health at Work, Work Experience.

Who is it aimed towards?

Healthcare Assistants working in the acute care environment .

Who is eligible?

Healthcare Assistants (HCA) who do not have a QQI level 5 Major Award. Each applicant attends a Pre-Learning Advisory meeting with the Course Coordinator (Registered Nurse Tutor) to assess their suitability to undertake the course. Applicant HCAs must be working in an area where they can attain and maintain competence in the skills they are taught on the course. Applicant HCAs must have a Link Nurse (RGN) for the duration of the course, who will undertake supervised practice and clinical assessment.

How is it delivered?

Blended-learning format: two modules are taught in the Nurse Education Centre: Activities of Living Patient Care and Care Skills. The remaining six modules are delivered online by an external education provider, and accessed by the HCA learner independently.

Can external applicants apply?

Yes.

Number of places available:

20 places available

Frequency:

Annually

Closing Date:

Four months prior to start date

Duration:

Ten months

Resuscitation Training

- ⇒ Heartsaver CPR & AED Course
- ⇒ Basic Life Support (BLS) Healthcare Provider (HCP)
- ⇒ Basic Life Support (BLS) (blended)
- ⇒ Advanced Cardiac Life Support (ACLS) Classroom based
- ⇒ Heartcode Advanced Cardiac Life Support (ACLS) (blended)
- ⇒ ACLS Experienced Provider

Resuscitation training is provided to staff as identified in the SVUH resuscitation training policy and offered to other staff who express an interest to attend as agreed with their line manager.

The purpose of resuscitation training is to provide course participants with the knowledge and skills required to recognise when a person is in cardiac arrest, to activate the cardiac arrest team and to provide high quality CPR (cardiopulmonary resuscitation) and to use an AED (automated external defibrillator).

Course participants are taught how to recognise and treat a person who is choking. Course content varies depending on the level of training required and the role of the staff member within the organisation. American Heart Association / Irish Heart Foundation (AHA/IHF) certificates are awarded for the majority of courses as well as CEUs from the Nursing and Midwifery Board of Ireland and CPD points from the Royal College of Surgeons of Ireland.

Heartsaver CPR & AED Course

About

Classroom, video-based, Instructor led course that teaches Adult and Child CPR and AED use, Infant CPR, and how to revive choking in Adults and infants.

The course teaches skills with the AHA's research-proven practice-while-watching techniques which allows the instructor to observe the student, provide feedback and guide the students learning of skills. No written exam.

Who is it aimed towards?

Mandatory for all HCA staff and optional for Porter and security

Who is eligible?

Course is for SVUH ancillary staff only

How is it delivered?

Classroom based Instructor led course with aid of DVD

Can external applicants apply?

Not open to external applicants

Cost:

Free for internal applicants

Number of places available:

6 per class

Frequency:

Twice a month

Duration:

4.5 hours

For more details contact:

Mandatory Training Administrator: Deirdre O'Riordan (01) 2214039; d.oriordan@st-vincents.ie

Basic Life Support (BLS) Healthcare Provider (HCP)

About

Classroom-based, instructor-led, DVD practice-while-watching course. The course covers adult, child and infant, CPR, choking and use of Automated External Defibrillator (AED) and bag-valve-mask device (BVM). Successful completion of multiple choice question test (84%) and skills assessment required. An American Heart Association/Irish Heart Foundation certificate is issued and is valid for two years.

Who is it aimed towards?

Mandatory training. Required by all clinical staff with direct patient contact.

Who is eligible?

All clinical staff with direct patient contact.

How is it delivered?

The course can be completed two ways; online or classroom based.

Online

Blended. Pre-course theory and test (84%) and instructor led skills practice and skills assessment.

Classroom

Classroom-based, instructor led, theory and practice. Skills assessment and multiple choice question test. Pass mark 84%. Successful completion of both MCQ and Skills test required for certification.

Can external applicants apply?

BLS training is for SVUH clinical staff only

Cost:

Free for internal applicants

ACLS Experienced Provider

About

The aim of the ACLS Experienced Provider (ACLS-EP) Course is to improve outcomes in the complex cardiovascular, respiratory and other (ie metabolic, toxicological) emergencies by expanding on core ACLS guidelines and encouraging critical thinking and decision making strategies. Through instruction and active participation in case based scenarios, learners enhance their skills in the differential diagnosis and treatment of pre arrest or post arrest patients.

Who is it aimed towards?

The course is for seasoned/experienced healthcare providers who are proficient in performing BLS and ACLS skills, and interpreting ECGs, and understanding ACLS pharmacology and who regularly lead or participate in emergency assessment and treatment of peri arrest or post arrest patients.

Course prerequisites:

A current AHA BLS Certificate. Desirable current ACLS Provider Courses. Please note anyone who does not hold a current in date ACLS Certificate MUST pass all ACLS Provider skills assessments in order to proceed further in the ACLS EP Course.

How is it delivered?

Classroom-based, instructor-led with aid of DVD

Can external applicants apply?

This course is only open to SVUH clinical staff

Cost:

Free for internal applicants

Number of places available:

18 places available

Frequency:

Twice yearly

Closing Date:

Advanced Cardiac Life Support (ACLS) Classroom based

About

Classroom-based, instructor-led theory and practice of peri arrest and cardiac arrest scenarios. Acute coronary syndromes, stroke, tachycardias, bradycardias and cardiac arrest scenarios are presented. Successful completion of multiple choice questions (84%) and skills assessment required. An American Heart Association/Irish Heart Foundation certificate is issued and is valid for two years.

Who is it aimed towards?

Mandatory training for those carrying cardiac arrest bleep and for staff working in Emergency Department, critical care areas and anaesthetics.

Who is eligible?

Staff carrying cardiac arrest bleep and for staff working in Emergency Department, critical care areas and anaesthetics. In date BLS is required to attend ACLS course.

How is it delivered?

Classroom-based, instructor led, practical. Pre-course reading required.

Can external applicants apply?

Yes

Careful Nursing Philosophy & Professional Practice Model- Theory & Practice Programme

About

This course introduces the nurse to Careful Nursing in SVUH.

This is a new Irish Philosophy and a Professional Practice Model of nursing care created by Dr. Therese Meehan, and applied to the acute care setting.

The Learning units focus on the Philosophy and Professional Practice Model, concentrating on two dimensions called the 'Therapeutic Milieu' and 'Practice Competence and Excellence'.

It also introduces the use of standardised nursing languages called NANDA-I, NOC and NIC.

The workshop introduces care planning to develop skills and knowledge on identifying Nursing Diagnosis using NANDA-I, outcomes using NOC and evidence based interventions using NIC.

Who is it aimed towards?

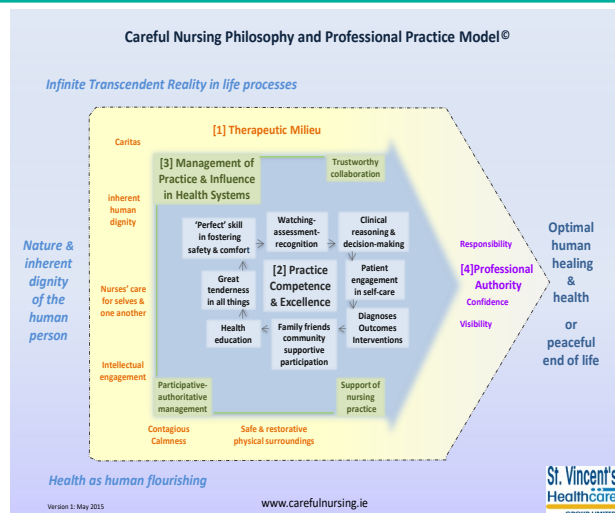

All nursing grades working in Careful Nursing wards and associated specialities.

How is it delivered?

Blended learning; on-line learning units followed up with an in house workshop

Can external applicants apply?

This course is only open to SVHG employees

Cost:

Free for internal applicants

Number of places available:

10 –15 places available

Frequency:

Six weekly

Closing Dates:

Two weeks prior to workshop in order to complete the learning units before attending

Duration:

Learning Units online 8.5hr total
Workshops three hours

Intravenous Medication Administration Programme

About

This course focuses on best practice and SVUH policy on the storage, preparation and administration of intravenous medication by nurses. It also examines the routes of intravenous administration (PVC, CVAD) and applies local policy in accessing and administering medication via these routes.

Who is it aimed towards?

Staff Nurses who are required to obtain competence in the administration of Intravenous Medications

Who is eligible?

These learning units are suitable for registered nurses.

How is it delivered?

All the theory is undertaken by the participant through self directed learning units via MyView and followed up with a practical workshop.

The on-line learning units are

- LU-Nurse-00101 Aseptic Non Touch Technique ANTT®
- LU-Nurse-00102 Intravenous Medication Administration Policy and Preparation of Intravenous Medications
- LU-Nurse-00103 Central Venous Access Devices (CVAD)
- LU-Nurse-00104 Intravenous Medication Calculations

All staff undertaking the IV Medication workshop are also required to complete: Managing Anaphylaxis- refresher programme on HSEland.

Clinical competence is to be achieved in order to obtain certification.

External applicants certificate of theory and attendance only.

Can external applicants apply?

Yes

Cost:

€85 for external applicants

Free for internal applicants

Number of places available:

18 places available

Administration of Parental Nutrition (PN)

About

These three learning units and associated competence will assist the RGN in developing the skills to care for patients receiving Parental Nutrition. The learning units for the education programme are listed below; all three units must be done in sequence. Throughout the units are quiz questions to test your learning.

Who is it aimed towards?

Staff nurses & CNM's who care for patients receiving PN

Who is eligible?

RGN who have already completed their Intravenous Medication Administration Clinical Competence.

How is it delivered?

- ◆ LU-Nurse-00101 Aseptic Non Touch Technique
- ◆ LU-Nurse-00103 Care of a Central venous Access Device
- ◆ LU-Nurse-00183 Administration of Parenteral Nutrition
- ◆ Competency Assessment

Once you have completed all three learning units please print the certificate associated with LU-NURSE-00183 Parenteral Nutrition. Please present this certificate of completion to your Assessor when you are undertaking Clinical Assessment. When you have completed the three learning units please contact Leah Palado who will arrange for your competency to be assessed. On completion of competency, please return your assessment booklet to the NEC for final certification.

National Frailty Education Programme

About

This national programme was developed to provide healthcare professionals with an understanding of frailty coupled with the knowledge and skills required to provide effective care to older people living with frailty as a long-term condition, wherever they access health services. The programme has evolved out of collaborative working between the Older Persons, Acute Medicine and Emergency Medicine Clinical Programmes in Ireland (Specialist Geriatric Services Model of Care, 2012).

The philosophy underpinning this education programme is to promote excellence, encourage innovation and creativity in the management of the older person living with frailty.

Who is it aimed towards?

This programme is designed for all health professionals working with the older person

How is it delivered?

This is a one-day classroom based 8 hour programme. This programme uses PowerPoint presentations, group discussions, video clips and reference material to enhance learning.

Can external applicants apply?

Yes this programme is designed for health professionals working with the older person across the acute, community and residential sectors in CHO 6.

Cost:

No associated cost

Number of places available:

24 places available

Frequency:

This programme is generally facilitated 4-5 times over the calendar year in SVUH. It will be accessible to SVUH staff in other locations in CHO 6 also

last quarter 2019 dates to be circulated when confirmed

Duration:

8 hours

For more details contact:

Co-ordinator: Orla Leonard, RNT, (01) 2214854; o.leonard@st-vincent's.ie

Assessing Competence of the BSc Nursing Student Programme

About

To provide Registered Nurses with the skills to facilitate the Preceptorship and Assessment of BSc Nursing students using the Domains of Competency Assessment Tool.

Who is it aimed towards?

All Registered Nurses working in St. Vincent's University Hospital.

Who is eligible?

A Registered Nurse with at least 6 months post registration experience.

How is it delivered?

This is a blended learning approach. The online course 'Preceptorship in Practice' on HSEland must be completed prior to commencing the learning units. The theoretical component is carried out by completing the three self-directed learning units. This is followed up with a two hour practical workshop facilitated by Clinical Placement Co-ordinators (CPC's).

Can external applicants apply?

Only SVUH registered nurses are eligible

Cost:

Free for internal applicants

Number of places available:

12 places available

Frequency:

Cardiac Rhythm Recognition Skills

About

The primary focus of this course is on the development of practical nursing skills in Electrocardiograph (ECG) basic rhythm interpretation.

During the course the participants will gain the knowledge required to interpret a normal ECG waveform using a systematic approach. They will also learn how to interpret the most common Atrial and Ventricular arrhythmias, and the immediate first line nursing management of the patient.

On successful completion of the online learning Units, a clinical workbook and theoretical exam each participant will be awarded a St. Vincent's University Hospital Certificate.

Who is eligible?

Post Graduate Nurses working in the clinical areas in SVUH where ECG interpretation is required.

How is it delivered?

Theoretical component;

The theoretical component is delivered in the form of learning units. Participants must complete four learning units in-advance of attending the supportive workshops. Admittance to the workshops will not be permitted if all learning units are not completed.

The skills component;

The skills component is delivered in the form of workshops, facilitated by clinical experts

Can external applicants apply?

St. Michael's and St Vincent's Private Hospital are also facilitated on the learning units

Cost:

Free for internal applicants

Number of places available:

10 places available

Frequency:

Every second month

Closing Date:

1 month prior to commencement

Duration:

The course is run over two days from:

08:00 – 11.30 approximately

Evidence Based Practice & Research Champion- Continuing Professional Development Module

About

- This module is shared among four hospitals (MMUH, SMH, SVUH and SVPH) under the guidance of Prof Laserina O'Connor, Professor of Clinical Nursing and accredited with UCD.
- This module is based on asking clinical questions, linking them with appropriate research studies and applying the evidence to practice.
- This module offers an opportunity to develop a culture for research as well as enhancing integration and collaboration among academic and clinical partners.

Who is it aimed towards?

Nursing managers, nurse specialists and general nurses who are interested in delving deeper into care at the bedside.

You are encouraged to take on the module as part of a 2 person team or you can work as an individual.

How is it delivered?

Over 12 weeks, you will attend 4 classroom sessions lasting 1 hour each.

You will get to lead out on 2 Journal Clubs in the clinical area with support from your mentor and complete a learning log to reflect after each session.

Finally you will present your chosen topic on a poster to the group on the final day.

Nursing Care and Management of Patients on St. Patrick's Ward

About:

A foundational competencies education programme for RGNs working on St. Patrick's ward. This blended-learning programme runs over 26 weeks, and aims to develop and maintain the specialist competencies required to safely and effectively care for patients with acute kidney injury, chronic kidney disease, and diabetes. Participants' knowledge and performance are assessed twice using the Assessment of Clinical Competencies format, from Benner's (1984) 'advanced beginner' to 'competent'.

Who is it aimed at:

Registered General Nurses (RGN) new to St. Patrick's Ward.

Who is eligible?

Any nurse working on St. Patrick's ward; must express interest to the Clinical Nurse Manager 2 (CNM2); must be approved by the Assistant Director of Nursing (ADoN).

How is it delivered?

Throughout the 26 weeks, the participant consolidates learning acquired from online learning units and workshops in clinical practice, and is supported by the CNM2 and Clinical Nurse Specialists on St. Patrick's ward.

Can external applicants apply?

No, the programme is designed to meet local service-needs.

Cost:

SVUH staff members do not incur any fees

Number of places available:

Graduate Diploma Critical Care Nursing - Intensive Care

Run in association with our education partner UCD

About

This programme is run in collaboration with our education partner, UCD. The Graduate Diploma Critical Care Nursing-Intensive Care provides the nurse with an opportunity to develop a greater understanding of the principles which underpin the various aspects of critical care nursing in relation to intensive care of critically ill patients. The students' knowledge and appreciation of nursing theory and biopsychosocial sciences, which underpin critical care nursing in intensive care, is augmented.

Who is eligible?

All applicants must:

- ◆ be on the live register maintained by the NMBI as a Registered General Nurse
- ◆ hold a primary degree (or equivalent) in nursing or a related discipline. APEL/RPL consideration if no degree.
- ◆ have one-year's post-registration experience
- ◆ be employed in the Intensive Care Unit and work a minimum of 78 hours per month

How is it delivered?

Six modules delivered using blended-learning format

Can external applicants apply?

The course is open to anyone working in an Intensive Care Unit nationally. Applications via UCD Central Applications: <http://www.ucd.ie/registry/admissions/apply.html>

Cost:

See UCD fees for further information

Number of places available:

20 places

Frequency:

September every year

Closing Date:

UCD: April each year

SVUH: February/March each year for fee sponsorship purposes

Duration:

One academic year

UCD accredited at
Level 9(NFQ)
60 ECTS

Continuous Professional Development in Cardiology Nursing Skills Course

About

This course aims to advance each participant's body of knowledge, skills and attitudes in order to enable them to adopt a safe, therapeutic and holistic response to the care of the cardiology patient. It has been designed to guide cardiovascular nurses, working in any area of practice, to provide high quality nursing care to patients manifesting aspects of cardiovascular disease. Throughout the course, the participant will be afforded the opportunity to demonstrate their ability to link theory with practice and to demonstrate clinical competency in a number of clinical practices in the cardiology Department.

Who is eligible?

Registered General Nurses who are permanent members of staff working in the Cardiology Department, in St Vincent's University Hospital

How is it delivered?

- ◆ Self-directed online Learning Units
- ◆ Clinical Workshops & Simulation
- ◆ Supervised Clinical Educational Support in Practice

Cost:

SVUH staff members do not incur any fees

Number of places available:

6-12 places

Continuous Professional Development in Cancer Nursing

About

This is a 6 month programme which has been designed to provide the participant with the core nursing skills required to safely, professionally and holistically care for patients with cancer. On course completion, the participant will be able to demonstrate her/his role in relation to patient-centeredness, patient safety, professional accountability and the need for accurate communication with all members of the multidisciplinary team, patients and their families.

It covers theory and practice of cancer nursing. It combines self-directed learning units (Via Moodle), clinical skills workshops and supervised clinical practice. Theoretical and clinical assessment is undertaken during the programme.

Who is it aimed towards?

Registered Nurses who are new to Cancer Nursing, or who wish to advance their theoretical knowledge and clinical skills in cancer care.

Who is eligible?

Registered General Nurses (RGNs). Participants must work within the specialist cancer clinical area for the duration of the course in order to obtain the required competency.

How is it delivered?

- ◆ Learning Units
- ◆ Workshops
- ◆ Clinical learning
- ◆ Clinical educational support

Can external applicants apply?

Only SVUH staff can apply

Continuous Professional Development Nursing the Person in a Medical Environment

About

The Nursing the Person in a Medical Environment is a four month clinically based course which aims to provide the participant with the knowledge, skills and attitude to care for the medical patient both safely, effectively and holistically. The medical patient often has complex care needs and requires skilled and competent nurses to meet these care needs. On-going competence to practice can only be achieved by a commitment to lifelong learning by all nurses.

Who is it aimed towards:

This is aimed at registered general nurses currently working in one of the general medical ward areas who wishes to enhance their nursing practice through engagement with evidence based information/clinical skills workshops

Who is eligible?

Registered general nurses on the live register with NMBI. Nurses who are currently working in one of designated medical ward areas. Approval must be sought from ADON.

How is it delivered?

This course is delivered in a blended learning format incorporating online learning units hosted on both My View and HSEland, Clinical skills workshops incorporating simulation and finally guidance in clinical practice.

Simulation was chosen as teaching/assessment strategy for this course as it provides a safe environment to assess clinical skills in a staged progression of increasing difficulty, appropriate for the level of the learner.

Can external applicants apply?

Currently only SVUH staff can apply

Cost:

SVUH staff members do not incur any fees

Number of places available:

6-10 places

Frequency:

As determined by clinical need, first course start date-October 7th 2019

Closing Date:

September 13th 2019

Duration:

16 weeks

Nurse Education and Practice Development Learning units.

Learning units may be standalone or grouped together to form a course. Some learning units are available to all nursing grades without enrolment required. For all other learning units enrolment is required, for access staff are required to be in an eligible area. Access is only granted by the Nurse Education & Practice Development Department.

Staff access the learning portal through the staff access and log-on with their MY-View details. External learners partaking of the learning units will receive an email with instructions and a link to the learn-on-line site.

Welcome to your Learning Portal Homepage.

Below you will find a series of Hubs that contain online courses linked to each category.
If you experience any difficulty accessing an online course, please contact d.woy@st-vincent's.ie

- Mandatory / Induction Hub**
All mandatory online training & content relating to Induction.
- Nursing Hub**
Over 100 learning units that are being developed by our Nurse Education & Practice Development Department.
- Medical Hub**
For Medical staff that require online training in Procedural Sedation, PRP and PPGs for Intrathecal Chemotherapy.
- Health & Social Care Professions Hub**
Online education in line with best practice for HSCP disciplines.
Coming Soon
- Management Development Hub**
Internally accredited (UCD) Management Development Programmes 2018/2019.
- Resource / Information Hub**
Access to further e-learning content, such as Microsoft Office online tutorials.

122	Ventricular Arrhythmias	LU-Nurse-00223
123	What is Diabetes?	LU-Nurse-00224
124	Insulin Therapy	LU-Nurse-00225
125	Oral Hypoglycaemic Agents	LU-Nurse-00226
126	Hypoglycaemia	LU-Nurse-00227
127	Hyperglycaemia	LU-Nurse-00228
128	ECG Rhythm Interpretation & Applied Physiology	LU-Nurse-00229
129	Atrio Ventricular Heart Blocks	LU-Nurse-00230
130	Inflammatory Heart Disease	LU-Nurse-00231
131	Intentional Rounding	LU-Nurse-00232
132	Fundamentals of Constipation and the Older Adult	LU-Nurse-00233
133	Urinary Elimination and the Older Adult	LU-Nurse-00234
134	Male Catheterisation -Part A	LU-Nurse-00235
135	Male Catheterisation -Part B	LU-Nurse-00236
136	Discharge Planning and Older Persons	LU-Nurse-00237

No.	Learning Unit Title	Code
137	Ethical Issues and the Older Person with/without Capacity	LU-Nurse-00238
138	Osteoporosis and the Older Adult	LU-Nurse-00240
139	Abdominal Assessment	LU-Nurse-00241
140	Chemical Eye Injury	LU-Nurse-00242
141	Non-Invasive Ventilation Part 3: Nursing Care	LU-Nurse-00243
142	Overview of Cystic Fibrosis	LU-Nurse-00244
143	Administration of Inhaled and Nebulised Medications	LU-Nurse-00245
144	Non-Invasive Ventilation Part 1: Principles of Respiratory Failure and Its Management	LU-Nurse-00246
145	Non-Invasive Ventilation Part 2: Clinical Application	LU-Nurse-00247
146	Nursing Management of a patient requiring Thrombectomy & Thrombolysis	LU-Nurse-00248
147	Skin Assessment, Risk Assessments and Prevention Planning	LU-Nurse-00249
148	Wound Assessment & Nursing Management	LU-Nurse-00250
149	Pressure Area Care and Nursing Management	LU-Nurse-00251

This list is current as of June 2019. This list will be updated with each update of the prospectus as new learning units are in constant development.
